ABOUT

I've graduated in Computational Mathematics at UFMG in 2019's december. During my graduation I discovered my passion for linear algebra and data science. I developed good analytical vision and computational logics, thanks to the optative courses on computer science I took along with the mathematical basis of the course, being capable of applying math in diverse computational methods. In my free time I like to play and listen to music, play video games and board games and to help in volunteer work whenever I can.

EXPERIENCE

Internship - Junior Researcher

ENACOM

Jun 2018 – Jun 2019

Belo Horizonte, MG, Brazil

- I was one of the developers of Progen, simulator and multi-objective optimizer for hydroelectric cascades developed in the GT588 project.
- I developed the constraints treatment of the simulator based on the client's preference, aiming to optimize the water use, maximizing the power generation.
- I studied about uncertainty treatment in hydroelectric cascade's inflow prediction, using stochastic processes and data science.

EDUCATION

Bachelor degree in Computational Mathematics

Universidade Federal de Minas Gerais

Mar 2016 – Now

Belo Horizonte, MG, Brazil

- Artificial Intelligence
- Machine Learning
- Game Theory
- Graph Theory
- Software Engineering
- Linear Algebra
- Differential Equations
- Operational Research

EXTERNAL COURSES

CS50 Web Programming with Python and JavaScript

HarvardX

Sep 2019 – Now

EdX

- Flask
- CSS
- JavaScript
- SQL
- HTML
- Git
- Scalability

Using Python for Research

HarvardX

Dec 2018 – May 2019

EdX

- Python
- Matplotlib
- Pandas
- Numpy
- SciKitLearn

LIFE PHILOSOPHY

"Do your best and you'll never have to regret."

PERSONALITY

Ambitious

I like challenges and overcoming them. Activities where I have to think a lot and dedicate are my favorite.

Serious and Sincere

I don't accept taking place in activities that go against the ethics or cause harm to someone.

Girl in science

I always try to support my female colleagues, creating a net for getting over the challenges of being a woman in computer science and mathematics area.

SKILLS

Dedicated

Leader and Organized

Self-taught

Analytical vision

Determined

Team work

Python

Git

Linux systems

HTML/CSS

Math Modeling

C/C++

Agile Method Scrum

Optimization

LANGUAGES

Portuguese

English

Spanish

INTERESTS

Artificial Intelligence

Optimization

Machine Learning

Math Modeling

Web Development
